#### ROLE PURPOSE/ACCOUNTABILITIES/OBJECTIVES -

As a general assistant, provide support to research scientist conducting trials at the Research Station in Visalia CA. Support will include but not be limited to:

1. Coordinating plant requirements for trial evaluations from seed to transplants, so that trial objectives are met on a timely basis
2. Become proficient with EXCEL and or ARM for data entry and maintenance materials
3. Assisting in pesticide applications for trials, and pending experience and training, capable of making applications with minimal supervision
4. From protocol directives and field scientist, collect required data
5. Complete all of the required safety training as a general assistant in Crop Protection Field Development
6. Maintain plants, insect colonies and fungi cultures as needed for testing.
7. Support other trialists at the site as needed.
8. Capable of working and developing irrigation and fertilization systems for greenhouse and field grown plants.
9. Capable of working in warm environments with plants, insects and pathogens.

#### KNOWLEDGE SKILLS & EXPERIENCE

**Critical Knowledge:** AA or AS with experience. Prefer B.S. with training and experience in applied research methods in entomology, pathology or horticulture. Horticulture and pathology preferred.

**Critical Skills:** Excellent people skills. Self-motivated and able to work alone, yet able to work with others as needed. Excellent oral and written communication and use of computer software (e.g. PowerPoint, EXECL etc). Capable of speaking Spanish is desired.

**Critical Experience:** Working in a greenhouse and field testing environment, and growing ornamental plants.
